

South East Florida Glass and Hardware
Brand Name: SOUFLO
Product: Shower Carolina Series

SPEC SHEET
Carolina Series
SOUFLO

Glass:

Safety:

Tempered.

Compatible with ANSI.Z97.1-2009 standards.

Once breakage occurs, the glass disintegrates into small cubical fragments which are relatively harmless to human body. Fragments are compatible with Cat. II tempering.

Material:

First class float glass.

Hardness:

After tempering, hardness, impact resistance and bending resistance are 4 to 5 times that of common non-tempered float glass.

Metal:

Hardware:

Anodized aluminum:

Use high strength aluminum extrusion

Machine-polished or brushed

Chemical surface treatment.

Anodized to increase surface hardness and give better appearance

Long durability.

Powder Coated Oil Rubbed Bronze:

Uses high strength aluminum extrusion.

After cleaning surface oil it is treated with phosphate, dried, then powder coated in high temperature oven.

The aluminum surface is even coated to get a good anti-rust performance and good appearance.

Towel Bars:

Use hard material of SUS304 stainless steel tube (wall thickness: 0.7mm)

Hand polished chrome or satin finish.

The surface finish has great appearance.

Good anti-rust performance.

Roller Clips:

High quality rollers slide smoothly and quietly.

Strong wear-resistance and high loading capacity.

Care:

Tempered glass may shattered with small impacts to the edges. Handle with care.

Do not use abrasive cleaning products to clean any of the metal parts.
